Mr. John Stith, of the grocery firm of Stith & Hottel, will be wedded next Tuesday afternoon at 2 o'clock, at the residence of the bride's mother, at Central Springs, to Miss Mable Goodwin.

One of Metz & Timothy's clerks has been mortally remarked to a fair dame yesterday "that the aristocratic society would recognize each instead of people dogging each other." This is tough on the girls.

The latest and most unique hat mark now in vogue, worn by several young men of this city, bears the following inscription: "Man, contemplate thyself in the presence of this emblem of mortality."

The town leader is the man who has no business, and would not attend to it if he did have, or else is a man who attends to what little business he does have, and to every body else's business in public places.

Our Circuit and County Court Clerks, to use a lonely expression, say that as usual during winter months they will be busy with the business of the court. Men who have legitimate and often private business with these public officers, have either to call them out in the cold or tell their business in the hearing of that prince of bores, the clerk's office.

A coal famine in this city is imminent and the chances are that it can not be averted unless there is rain soon. Most of the adjacent places are out of water and are having the greatest difficulty in securing enough to run their machinery. Local dealers are having much trouble in getting their orders filled and the consumers will soon begin to suffer at least, great inconvenience. Let us coal burners pay for rain—and a competing railroad.

Our young friend Birch Bassett is our authority that a religious society of Louisville recently discussed the question: "Ought we to let our hens lay on Sunday?" Birch can't see the propriety of such a violation. Neither can we. Birch, rather than suffer them to scratch up a neighbor's newly-made garden, he better be permitted to both eat and lay on Sunday. The former causes a more frequent discussion of one of the commandments.

Thursday afternoon our reporter picked up the following poetic effusion in the postoffice:

"A brilliant sat on the fence,  
Over the garden wall,  
The back of his head was all full of  
Over the garden wall,  
He was all battered up, like an old tin  
His back was skinned from head to tail,  
So he let himself out in a mighty wail,  
Over the garden wall."

All that remained of Tom was laid  
Over the garden wall,  
Over the garden wall,  
The grave stones were all laid out  
No more was to be seen of his tail,  
His back was skinned from head to tail,  
So he let himself out in a mighty wail,  
Over the garden wall."

There is nothing on earth so mysteriously funny as a newspaper advertisement. The first, first half of the line, object of an advertisement is to draw custom. It is not, as is not, and never will be designed for any other purpose. So the merchant waits till the busy season comes, and then he is full of custom he can't get his hat off, and then he rushes to the newspaper and puts in his advertisement—all right. When the dull season gets along, and there is no more to be had, he takes out his advertisement. That is, some of them do, but occasionally a level-headed merchant puts in a bigger one and expects all the business he can get. He is making money to pay his gas bill.

The news of the death of Henry B. Wilson created quite a shock on our streets yesterday morning. Mr. Wilson died at 1 o'clock yesterday morning, at his home on Main street. He had been ill with malaria for ten days, but the community did not regard his illness as serious, as it was wholly unexpected for his untimely death.

On Saturday, however, pneumonia developed and carried him off quickly—Clarksville Tobacco Leaf.

The latest railroad gossip is that the Louisville & Nashville people are willing to let the Ohio Valley company have the L. & N. branch from Princeton to Nashville on good terms. Keep the O. V. out of Hopkinsville and that such a trade is likely to be consummated on the further condition that the O. V. will not waste any money in trying to get to Nashville. This is not the only condition for all this nonsense—Clarksville Chronicle.

The Methodist oyster supper at the City Court room Tuesday night was a decided success. The menu consisted of oysters in every conceivable style of cookery, salads, pickles and sauces, innumerable, fragrant, hot coffee and plump, pretty girls. The hungry saint who partook of the feast for a half dollar or on a "press compulsion" got the full worth of his money.

A substantial sum was realized and the benevolent ladies will put the same to good use.

Mr. W. R. Long, who visited Kansas City, recently, returned home last week. He says he encountered a young lady fresh from Sandiego, Cal., who told him that chickens sold out there at 200 per dozen, and eggs at 50 cts. per dozen.

The City Council held its regular meeting Tuesday afternoon. The session was one of the most unimportant and unimportant held for years, and it is hardly necessary to give publicity to the insignificant questions that upon the agenda were placed.

Signer was granted permit to box telephone in front of his drug store. Ordinance granting right to Hopkinsville Electric and Fuel Company to place pipes in street resumed. Having no other business up for consideration the meeting adjourned.

Princeton has prohibition. Saturday night at 10 o'clock the last whisky barrel and decanter was emptied—the last bottle and jug filled to order and the last of the city's saloons closed. It does so quietly as if saloons were to be re-opened as usual the next morning. For several weeks past Messrs. Smith & Edwards, proprietors of the saloon just closed, have been enjoying a paying monopoly of the business of the city. Several addresses on moral reform were made on Saturday afternoon and Sunday morning. Preaching was held on Saturday night and Sunday morning.

Hopkinsville's Tobacco Trade.  
A representative of the New Era utilized an hour of his valuable time Tuesday afternoon in conversation with one of the leading warehousemen of this city upon the subject of "Tobacco," something which interests every farmer in the county.

Principal Constituents of the Different

Classes of Mineral Waters.

The water of many springs holds in

solution sulfur, earthy and metallic

ingredients. Such springs are found in

many parts of the earth, such as

France, Germany, Italy, etc. The

water of the springs of the

Pyrenees, for example, is rich in

sulfur, and is used for the treatment

of various diseases. The water of

the springs of the Alps is rich in

calcium, and is used for the

treatment of various diseases. The

water of the springs of the

Carpathians is rich in iron, and

is used for the treatment of

various diseases. The water of

the springs of the Apennines is

rich in magnesium, and is used

for the treatment of various
